

Industrial Line

3b Electric Contacts

Technical Data Sheet
n° 251 Rev. 10/10/2013

Category:

- Spray cleaner
- Protection for circuits

Applications:

- Removes humidity from electric circuits
- The oily version protects them

Advantages:

- Cleans circuits without having to dismount them

Spray cleaner for non current-carrying electronic & electrical component cleaning

Applications

Degreases and removes humidity from the non current-carrying (please note the product is flammable) electronic & electrical components. Offers a fast and easy cleaning and protection of the electrical components without dismounting the boards or the devices. 3b Electric Contacts is offered in two versions: dry and oily. The former, evaporating, does not leave any residue; the latter contains an isolating oil, which remains on the surface after the evaporation and protects the electrical circuits, isolating them from the immediate environment and from atmospheric agents.

Method of Use

Shake well the canister and spray evenly at a distance of 15-20 cm. on the interested part, ensuring a uniform and homogeneous product dispensation.
If you need to intervene in places of difficult access, it is advisable to use the supplied special extension tube.

Technical features

Form	Spray
Colour	Colourless
Density (20°C)	1.070 g/cm ³

Product for industrial/professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.
