Ebanil

Technical data sheet
n° 087 Rev. 03/07/2018

Category:

- Wood reviver and protector

Applications:

- Furniture and furnishings in wood

Advantages:

- Valuable aesthetic effect
- Linseed and teak oil-based
- Immediate splendour

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Wood reviver and restorer (with fine boiled linseed and teak oil). Speciality for antique dealers

Applications

Ebanil is a reviving agent based on fine boiled linseed and teak oil able to renew and protect any wooden surface.

The natural veins are enhanced and the wood is revived and nourished in depth.

Ebanil makes the furniture waterproof and protects it from moisture and, thanks to its antistatic properties, holds off the deposit of dust.

Fields of Application

Ebanil also has a regenerating function that gives again the original splendour to antique furniture, precious frames, doors, doorjambs, boat furniture and other wooden furnishings.

It is therefore ideal for use in the treatment of antique wooden furnishings. Appropriate also for outdoor woods.

Method of Use

Soak a soft, dry cloth with Ebanil and wipe it over the parts to be treated until it is completely absorbed.

On old and/or never treated before wood, it is advisable to repeat the operation.

A preliminary test on a small surface is recommended before use.
