Lubix

Technical Sheet n° 115
Rev. 03/07/2014

Category:

- Special products

Applications:

- Lubricates effectively knotters and cinematisms in the textile industry.

Strenghts:

- Effectiveness
- Practical use with spray

Product for professional use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Spray lubricant for knotters and cinematisms

Applications

Lubix is a low viscosity spray lubricant for the textile industry. Lubix penetrates fast into all recesses to be lubricated and spreads uniformly, leaving a thin, colorless, odorless lubricating veneer.

With Lubix, knotters, cinematisms and other movement devices are always well lubricated and kept clean over time. This contributes to reducing maintenance interventions and times while machines are out of action.

How to use

Shake the spray can well, spray from a distance of about 20 cm, wait a few seconds and start the machine. If necessary, especially in case of leakages of substances, we recommend a second application. When the point to be lubricated is not easily accessible, use the extension tube provided.

Scope of use

The product has been specifically conceived and developed for use in the textile sector.
