n° 229 Rev. 28/04/2014

Category:

- Products for vehicles maintenance

Applications:

- Vehicles and relative accessories washing

Advantages:

- Highly concentrated
- Polishes and protects bodywork

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Self-polishing detergent for vehicles bodywork and tarpaulins

Applications

Road Brill is a product for the cleaning and treatment of vehicles bodywork and tarpaulins.

Road Brill thoroughly washes the surfaces and spreads on them a particular substance with a water-repellent effect.

After using Road Brill, the water is repelled, draining as water drops and avoiding the formation of streaks and spots due to detergent residues and limescale.

On the bodywork, the effect is long lasting and even more on the rubberized canvasses, where it penetrates and protects deeply.

Fields of application

Road Brill is also suitable for cleaning tarpaulins and hoods and for many plastic and resin surfaces.

It can be used in many activities such as:

- Bodywork shops
- Car repair
- Car dealers
- Domestic use
- Special applications
- Trucking companies
- Bus operators
- Local transport companies

Method of Use

Dilute the product in a quantity of 10 ml in a litre of water (a small cup of coffee in 5 litres of water). Wash the vehicle with a sponge or a synthetic cloth, then rinse thoroughly.

Immediately you will see the draining effect of the water drops. It does not contain silicones.
