Oil for guided slides

Category:

- Oil for guided slides

Applications:

- Lubricates and protects the guides and the slides of machine tools

Advantages:

- Highly efficient
- Long-lasting

Applications

Highly adhesive oil for guided slides and high quality slides, with anti-drip properties. It avoids jamming and shaking of the machines that occur during low forward speed movements, as it happens in grinding, boring, milling slides, etc.

It contains complex and balanced additives and has the following characteristics:

- High load resistance
- High greasiness and adhesiveness,
- Anti-wear properties,
- Anti-rust,
- Anti-foam and anti-drip and anti stick-slip.

It satisfies the Cincinnati Milacron specifications by a wide margin. It can also be used as a hydraulic fluid.

Method of Use

Follow the instructions of the tool manufacturer in which the lubricant is used.

Technical features

Appearance	liquid
Viscosity at 40 °C	68 cSt.
Viscosity index	110
Pour point	-16 °C
Flash point	210 °C

Product for industrial/professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.
