Polishing revitalizing spray for inflatable boats

Description

Seamaster Raft Shine protects the raft from cracking due to wear and UV rays and makes the surface like new. The use of Seamaster Raft Shine "feeds" the inflatable boat, makes it new and extends its life. The convenient spray form makes using the product even easier.

How to use

Clean the boat with Seamaster Raft Cleaner and allow to dry.

Shake well the spray can, than spray the product on the raft from a distance of about 20 cm and pass over with a soft cloth to obtain a homogeneous absorption and a glossy surface.

Apply a second coat if necessary.
