

PETRANET

Technical data sheet n° 310 Rev. 01/04/2014

Fast action acid-based stone cleaner

APPLICATIONS:

Petranet is a specific acid cleaner to remove limestone, salt efflorescence, rust, moss and smog residues from natural stone floors and walls, bringing them back to their original aspect.

Petranet is effective on all stone surfaces, both of calcareous origin (such as marble and travertine) and siliceous (such as gneiss, porphyry and granite).

Before using Petranet on limestone, carry out a test on a small part of the surface to be treated.

Never use on polished marble surfaces.

METHOD OF USE:

Get rid of any dirt that can be removed manually (use a rigid plastic brush). If necessary, degrease in depth with a specific detergent such as Marmosol. Rinse thoroughly and apply Petranet (as it is or diluted as needed) using an acid-resistant brush or paintbrush. Let it act for a few minutes (from 5 to 15), then rinse thoroughly.

In case of particularly stubborn deposits or dirt, repeat the application.

CATEGORY:

- Acid cleaners

ADVANTAGES:

- Great efficacy
- Ultra rapid action
