

QUEEN PARQUET

Technical data sheet n° 017 Rev. 16/02/2018

Neutral wax for parquet. It polishes, renovates and protects

APPLICATIONS:

Queen Parquet is a natural based wax, excellent for polishing and lastingly protecting laminated, pre-finished, varnished and unpainted parquet.

Queen Parquet is practical to use, has an excellent resistance to footfall and makes the treated surface antistatic, which reduces adhesion of dust and dirt.

The regular use of the product allows keeping the parquet protected, shiny and free from scratches and imperfections.

METHOD OF USE:

Wash the floor thoroughly with Parquesan neutral detergent and allow it to dry.

Pour Queen Parquet pure or diluted on a damp cloth and distribute evenly. The product must be applied criss-cross first horizontally and then vertically.

If necessary, brush with a cloth or a floor polisher.

In order to maintain waxing over time, thus reducing intervention times, we recommend regular use of Parquesan.

Yield: The recommended dose of Queen Parquet is 25 ml (about half a small cup of coffee) per m² of surface to be treated.

Dilutions: For a deep waxing, apply the product as it is; for ordinary waxing or in any case for easier spreading, dilute 1:1 with water.

CATEGORY:

- Products for parquet

ADVANTAGES:

- Warm and natural tone
- Can be re-polished
