

TEXIL FIX

Technical Sheet n° 196 Rev. 03/07/2014

Temporary glue for yarns and tissues

APPLICATIONS:

Texil Fix is a temporary glue for yarns that can be easily removed with water or a solvent. When it is vaporized, the solvents contained in its formula evaporates rapidly and allow the product to develop its adhesive capacity.

The product has been tested on various types of yarns. The results have shown that it can be used on:

- viscose rayon
- acetate rayon
- cuproammonium rayon
- polyamide
- polyesters
- cotton, etc.

Texil Fix does not damage yarns and tissues.

METHOD OF USE:

Shake well the spray can for at least 20 sec. before use and spray on the part to be treated.

After use, before stowing the product, clean the valve spraying shortly with the spray can upside down.

FIELDS OF APPLICATION:

The product has been developed for the textile industry.
