

Industrial Line

Alfalux

Technical data sheet
n° 009 Rev. 02/07/2014

Automotive specific silicone polish

Category:

- Products for cars

Applications:

- Polishes and protect the car surfaces

Advantages:

- Easy spray use

Applications

Alfalux renews, polishes, waterproofs and provides a long-term protection of the vehicle surfaces such as doors, dashboards, spoilers, seats, bumpers, tyres, to which it gives splendour for a long time.

The product is suitable also for motorcycles, in particular for cleaning and polishing resin parts, external luggage, storage compartments and safety helmets.

The use of Alfalux is not recommended in environments, where painting operations are carried out or where silicone oils can cause damage. In this case, the use of non-silicone Alfalux is preferable.

Fields of application

Alfalux, in its two versions, can be used in many activities, such as:

- Body shops
- Auto repairers
- Hobby & D.I.Y.
- Household use

Method of use

Shake well the canister for at least 10 seconds, spray on the part to be treated and wait for a few seconds; then pass over with a dry, clean cloth and polish the surface.

In case you want to give a more accentuated protection or polishing, repeat the operation in the same way.

Product for industrial/professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.
