Basta Calcare

Technical data sheet
n° 838 Rev. 25/02/2016

Category:

- Anti-scale foam

Applications:

- Cleaning of bathroom and kitchen surfaces encrusted with limescale.

Advantages:

- Easy foam use
- Fast
- Efficient

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Removes limescale from all surfaces. Fresh fragrance.

Applications

Basta Calcare is a descaling detergent that, thanks to the special applicator, forms an active foam that cleans, polishes and protects bathroom and kitchen surfaces.

The foam of Basta Calcare acts deeply, more effectively than normal liquid products and facilitates the cleaning of vertical surfaces.

Basta Calcare easily removes water stains, limescale and soap residues that are deposited on taps, sanitary ware and ceramics of bathrooms and kitchens, leaving a fresh fragrance and a shine that lasts over time.

Basta Calcare does not damage chrome, mirrors and ceramic tiles and is therefore suitable for cleaning many surfaces, except marble, natural stone, painted surfaces, brass, and galvanized metal.

Fields of application

Basta Calcare finds its application in kitchens and bathrooms of all kinds of environments:

- Catering
- Domestic use
- Communities
- Hotels

Method of Use

Spray directly on the surface to be cleaned. Allow the foam to act and then rinse or wipe with a wet cloth. On the most resistant deposits let it work for about two minutes and then remove with a cloth. If necessary, repeat the treatment. It is not necessary to dry.

Alternatively, it is possible to spray the product on an absorbent cloth or on a sponge to pass over the surfaces to be cleaned.

Do not use on electrical appliances, hot, acid-sensitive, damaged or scratched surfaces. If in doubt, try a small and hidden area.
