

Industrial Line

HB 90

Technical data sheet
n° 098 Rev. 28/05/2014

Category:

- Solvent-based cleaner

Applications:

- Removes residues of markers, pens and highlighters

Advantages:

- Quick
- Efficient

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Solvent for the removal of markers (pens, highlighters, felt-tip pens etc.)

Applications

HB 90 is a balanced mixture of solvents which can dissolve and remove ink residues of the most common markers, such as pens, highlighters, felt-tip pens and others.

The product also has a good stain removing action for oil and dirt on fabrics.

HB 90 has been formulated for the textile sector, where the use of markers is widespread in the production steps of the fabric, especially during cutting and packaging phases.

Other uses are cleaning of furniture, laminate surfaces and anything else that is dirtied or marked by lines of markers, in environments such as schools, communities and offices.

Method of Use

Spread the product on the part to be cleaned with a dry cloth, or pour it directly. Wait a few seconds to allow it to act, then wipe or dry with a compressed air jet.

If necessary, repeat the cleaning operations.

In some cases, the product can affect the surface or the colour of the fabric. It is therefore advisable to carry out a preventive test on a small surface to see the results.

Technical features

Appearance	Clear liquid
Colour	Colourless
Odour	Solvent
Density (20°C)	0.820 g/cm ³
