

## Industrial Line

# Luby Prot

Technical data sheet  
n° 097 Rev. 03/07/2014

## Oily anti-rust protective spray for metals

### Category:

- Special products

### Applications:

- Protects metal surfaces from oxidation

### Advantages:

- Efficacy
- Easy spray use

## Applications

Luby Prot is an oily protective spray for all metals. Its characteristics make it a good anti-rust agent, as well as a strong water repellent.

Based on refined mineral oils and anti-rust and tackifier additives, Luby Prot furthermore neutralizes the acid vapours of plastic materials during moulding and profiling operations, preventing the oxidation of the moulds.

Luby Prot applies to the mechanical and constructive sector as an antioxidant protective agent.

## Method of Use

Shake well the canister for at least thirty seconds and spray the surface from a distance of twenty centimetres. If the piece to be treated contains corrugations or interstices, perform a second application.

## Fields of application

The product is used in different working situations and specifically:

- Mechanic industry
- Maintenance departments
- Mould maintenance
- Window and door installers
- Protection of precision mechanisms
