

Industry Line

Carbosol

Technical Sheet n° 037
Rev. 08/05/2014

Category:

- Detergents for the textile sector

Applications:

- Removes carbonized remains

Strenghts:

- Great effectiveness
- Concentrated product

Product for professional use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Detergent for washing carbonizing and singeing machinery

Applications

Thanks to its extremely powerful formulation, Carbosol, is the ideal detergent for washing batteries as well as singeing and carbonizing plants, in case of carbonized remains of fluff, sludge etc. that are not easily removable with normal products.

How to use

Dilute Carbosol with water in the proportion of 1 part of product out of 5 parts of water.

Vaporize the solution obtained with a low pressure nozzle and allow to react for 5-10 minutes. Finally, rinse with a high pressure water jet.

For cleaning batteries, the product can be used by dipping them in a 15-20% solution.

Do not vaporize on aluminum or other light alloys.
