

Industry Line

Cat/T

Technical Sheet n° 508
Rev. 19/01/2016

Granules melt ice/snow

Category:

- Melt ice/snow

Strenghts:

- Great effectiveness
- Faster and more efficient than salt

Product for professional and industrial use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Applications

Cat/T is an indispensable product for melting ice and snow in all those situations where the use of salt causes corrosion problems on delicate surfaces.

Cat/T, contrary to salt, does not stain stone, granite, marble surfaces, but not even wood, linoleum, etc., lending itself to making all walkable surfaces safe, which can become dangerous in case of snow or ice.

Unlike salt, CAT/T:

- releases heat in contact with the ice, acting much faster
- has a much higher melting capacity against snow and ice
- it is effective up to temperatures of -33 °C against the -6 °C of salt

How to use

CAT/T is in granules and is supplied in 25kg bags.
CAT/T yield is 5 times higher than salt.
1 kg of product is sufficient for 25-30 m² of surface.

Used in the recommended doses, CAT/T is not harmful to operators or to the ecosystem.
CAT/T can be deployed manually using simple rubber gloves.
