

Industry Line

HB 88

Technical Sheet n° 237
Rev. 28/05/2014

Category:

- Solvent based cleaner

Applications:

- Eliminates grease and oil residues

Strenghts:

- Quick
- Very low odor

Product for professional and industrial use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Medium evaporation solvent based degreaser

Applications

HB 88 is a degreaser consisting of a mixture of medium evaporation aliphatic solvents and additives which increase the effectiveness of the product against greases and oils of mineral, synthetic and natural origin, as well as on traces of markers and on some types of resins .

HB 88 has proved to be safe to use on metals of all kinds, including light alloys and aluminium.

If it is necessary to degrease plastic materials or painted surfaces, it is advisable to carry out a preventive test instead.

HB 88 can be used in many different realities such as:

- Mechanical Engineering
- Textile industry
- Nautical sector
- Machinery maintenance departments
- Craft workshops
- Wherever a low reactivity solvent based degreaser is needed.

How to use

Evenly distribute the pure product on the parts to be cleaned, using brushes, pressure sprayers and baths in case of small pieces.

Leave to act for a few minutes and intervene mechanically to remove the dirt, using rags, compressed air or brushes.

Technical specifications

Aspect	Clear liquid
Color	Colorless
Odor	Almost odorless
Density (20°C)	0,880 g/cm ³
