

## Industry Line

# Plexil

Technical Sheet n° 132  
Rev. 03/07/2014

## Plexiglass antistatic cleaner

### Category:

- Special products

### Applications:

- Prevents accumulation of static electricity on Plexiglas surfaces

### Strenghts:

- Effectiveness
- Practical use in spray

Product for professional and industrial use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

## Applications

Plexil is an antistatic spray for Plexiglas surfaces. The continuous use of Plexil also makes the Plexiglas shiny and protects it over time, preventing the accumulation of dust, without leaving traces of grease or dirt. Plexil is not aggressive even on the most delicate plexiglass or shiny plastic surfaces. Suitable for both transparent and colored plates. Recommended for the treatment of all Plexiglas, Altuglas or PMMA surfaces.

## How to use

Shake the can well before use, spray from a distance of 20 or 30 cm on the part of the surface to be treated. Repeat the operation at regular intervals. Wipe with a soft cloth if necessary.

## Fields of use

Experience from the use of Plexil indicates it is particularly suitable for:

- Plastic processing
  - Maintenance departments
  - Craft workshops
  - Machine construction
- and for all items made of Plexiglas.
