

## Industry Line

# Queen Car

Technical Sheet n° 371  
Rev. 08/09/2017

### Category:

- Car wax

### Applications:

- Specific hydro-brightener for car wash systems

### Strenghts:

- Dilutable product
- Lasting anti-drip effect

## Applications

Queen Car is a newly developed formulation specifically designed as a wax-water repellent for vehicle washing tunnels.

Its new formulation based on aqueous-phase microemulsion of cationic substances, gives the vehicle body a remarkable anti-drip capacity, which remains for a long time even after days of exposure to sunlight and humidity.

The product has a remarkable drying speed and leaves a waxing effect of great brightness. The product was developed as a specific water-repellent wax for car wash tunnels.

## How to use

Queen Car is used for waxing in automatic plants in different concentrations, depending on the dosing system used.

Generally it is used pure or pre-diluted 1:10 in water, and poured into the appropriate container equipped with a regulating valve which will also be adjusted according to the desired effect.
