

## Industry Line

# Sblocca/L

Technical Sheet n° 826  
Rev. 23/07/2015

### Category:

- Lubricants

### Applications:

- Triple action:  
Unblocks,  
lubricates and  
protects

### Strengths:

- Effectiveness
- Speed of action

Product for professional and industrial use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

## Lubricant unblocker Protective

### Applications

Unblock is a three function product:

- **Unlocking** - allows for quick disassembly of screws, nuts and bolts. Eliminates grease and oil residues, even partially carbonised. Enriched with slips able to facilitate unscrewing, acting as friction moderators;
- **Lubrication** - thanks to special oils that lubricate the mechanical parts, both disassembled and assembled;
- **Protection** - thanks to hydrophobic anti-rust additives which, remaining on the part, ensure long-lasting protection.

### How to use

Use by spray, brush or immersion.  
Leave to act for a few minutes, then unscrew and remove the screws, nuts and bolts. Possibly, in the presence of fouling more Resistant, repeat the operation.

### Fields of use

The product can be used wherever one or more of the three Sblocca functions are required, in environments such as:

- garages
- maintenance departments
- fine mechanics
- lubrication of mechanical parts
- protection of metal parts
- bricolage, do it yourself
- mechanical workshops
- home maintenance
